DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

This application is in condition for allowance except for the following formal matters:

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the smallest curvature radius R_i of inner wall and smallest curvature radius R_o of external wall of the seamless boundary portion between the center bulb and the side tube as claimed in claim 1 must be shown or the feature(s) canceled from the claim. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 2879

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested:

--METAL VAPOR DISCHARGE LAMP HAVING CONFIGURED ENVELOPE
FOR STABLE LUMINOUS CHARACTERISTICS--.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

Claims 1 and 2 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither teaches nor suggests ceramic envelope for a metal vapor discharge lamp comprising all the claimed limitations set forth in claim 1 particularly comprising the curvature radii R_o of external wall and R_i of inner wall of boundary portion between the center bulb and side tube satisfying the relation $1.28R_o \leq R_i \leq 1.39R_o$.

Regarding claim 1 the closest prior art by Miyazawa (USPN 6,747,411) teaches (column 3 lines 32-46 Figs. 1A, 1B) a high intensity discharge lamp capable of reducing light color changes and extending the service life with ceramic envelope having center bulb diameter of 13.0 mm (D) and radius of curvature R_i of inner wall at the boundary end portions of 1.0mm satisfying

$$-0.00076P + 0.304 \leq R_i / D \leq -0.00076P + 0.490 \text{ for power } P = 350 \text{ watts.}$$

But Miyazawa fails to teach or render obvious a metal discharge lamp having radius of curvature R_o of outer wall at the boundary portion satisfying $1.28R_o \leq R_i \leq 1.39R_o$.

Claim 2 is allowed because of its dependency status from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,707,252 to Kakisaka et al. and U.S. Patent Application Publication 2004/0263080 to Brates et a. disclose discharge lamp with configured discharge chamber.
